# Overview & Business Need

In areas with high recreational boating activity, such as coastal resorts, marinas, and lakeside towns, traditional food delivery systems fail to reach customers who are actively on the water. Recognizing this gap, our client envisioned **BoatBites**, a multi-platform system that enables **boaters to order food from nearby restaurants** and have it delivered directly to their location via **Jet Ski drivers**.

The system includes:

- A **Boater Mobile App** for end users
- A **Driver Mobile App** for Jet Ski delivery personnel
- A **Vendor Web Panel** for restaurant partners
- A centralized **Admin Panel** for platform management

The system focuses on real-time service coordination, waterway-aware navigation, and seamless financial and order management.

## Target Users

- **Boaters:** Customers floating or anchored near service zones, seeking convenience.
- **Jet Ski Drivers:** Freelance or employed delivery personnel using watercraft.
- **Vendors/Restaurants:** Businesses serving food near the coastline or lake.
- **Admin/Operations Team:** Manages vendors, services, payouts, and customer service.

# Boater Mobile Application

## Objective:

Allow boaters to place food orders while on the water, view restaurant options, and make secure payments.

## Features:

### 1. User Authentication:

- Mobile/email-based registration & OTP login.
- Basic profile setup with location permission.

### 2. Geo-Fenced Restaurant Discovery:

- The app automatically detects available restaurants based on the **boater's water location**.
- Uses a **marine geo-fencing** algorithm to avoid showing inland-only restaurants.

### 3. Menu Exploration & Ordering:

- Interactive UI to browse menus, view dish images, and customize orders.
- Real-time item availability sync with vendors.

### 4. Seamless Checkout:

- Payment via **Credit Card** and **Apple Pay** integration.
- Option to **add a tip for the driver** during checkout.

### 5. Live Order Tracking:

- Real-time updates (Order Placed → Preparing → On the Way → Delivered).
- The map view shows the Jet Ski driver's movement toward the user.

# Driver Mobile Application

## Objective:

Enable Jet Ski delivery personnel to receive orders, navigate water routes, and deliver safely.

## Features:

### 1. Driver Onboarding:

- Register with email and phone, upload identification, and Jet Ski license.
- Profile approval by the admin is required.

### 2. Order Management:

- Receive delivery requests with order and pickup location.
- Option to accept or reject.
- Delivery status updates: Accepted → Picked Up → Delivered.

### 3. Marine Navigation with ARGO Map:

- Integration with ARGO Marine Navigation API.
- Calculates **water depth, currents, and obstructions**.
- Suggests the **safest and fastest path** to the customer location.

### 4. Earnings and Tips:

- Drivers view completed orders, tips received, and payout summaries.

# Vendor Web Panel

## Objective:

Empower restaurants to manage their digital storefront, menus, and orders.

## Features:

1. **Vendor Registration and Payment Setup:**
  - Sign up with your email, restaurant details, and a Stripe account for payouts.
  - Admin approval process before going live.
2. **Restaurant & Menu Management:**
  - Add/update restaurant name, address, and location radius.
  - Upload menu items with descriptions, images, and prices.
3. **Order Handling:**
  - Receive real-time order alerts.
  - Accept or cancel orders with reasons.
  - Status updates are automatically pushed to the boater and driver apps.
4. **Order History & Analytics:**
  - Filterable list of previous orders with revenue summaries.
5. **Location Configuration:**
  - Define serviceable zones.
  - Set delivery availability times and special days.

# Admin Panel

## Objective:

Provide complete control and visibility over all stakeholders and platform operations.

## Features:

1. **Authentication & Role Management:**
  - Admins access using secure login with activity tracking.
2. **Dashboard Overview:**
  - Key metrics: Total orders, daily active users, live deliveries.
  - Map-based view of active vendors, drivers, and orders.
3. **Order Monitoring:**
  - View and filter all orders: active, canceled, completed.
  - Drill down into specific transactions and timelines.
4. **Vendor Management:**
  - Approve or reject vendor applications.
  - Suspend vendors for policy violations.
  - Configure service hubs (regional clusters for restaurant delivery).
5. **Service Hub Configuration:**
  - Associate restaurants and drivers with a hub (based on region or water body).
  - Set custom **discounts and payout percentages** per hub.
6. **Search, Filter, and Reporting:**
  - Search by boater, driver, order ID, or vendor.
  - Downloadable reports for finance, operations, and logistics.

# Technology Stack

Component	Technology
Mobile Apps	React Native
Backend API	Node.js
Database	PostgreSQL
Web Frontend (Admin)	React.js
Maps	ARGO Marine API
Authentication	Firebase / Auth0
Payment Integration	Stripe, Apple Pay
Hosting & DevOps	AWS (ECR, EC2, RDS, S3, CloudWatch)
Notifications	Firebase Cloud Messaging

## Outcomes & Benefits

- **Successful launch** in multiple coastal regions with over 100+ vendors onboarded within 3 months.
- **Avg delivery time reduced by 30%** through marine path optimization.
- **Increase in order volume** due to boater convenience and premium delivery novelty.
- **Secure and compliant payment** processing with automated Stripe payouts to vendors and drivers.
- **End-to-end visibility** for admins to manage logistics, customer experience, and issue resolution.

How does delivering with BoatBites work?

Delivery drivers can only use a personal watercraft, no watercraft with a propeller. Drivers earn an hourly wage and keep 100% of customer's tips.

Where is BoatBites available?

BoatBites launched on Florida's west coast in 2023 and we are quickly spreading across Florida. In April 2025, we are operating from Tampa south to Naples. Our schedule is to be in Miami and Ft Lauderdale in May and June and the rest of Florida by the middle of the summer. Send us an email at [drive@boatbites.app](mailto:drive@boatbites.app) to see if we are in your area.

# Admin Panel

The image shows a split-screen view of the BoatBites Admin Panel. On the left, the sign-in page is displayed with a dark background. It features the BoatBites logo at the top, followed by the tagline "Anchor. Order. Enjoy.". Below this, the heading "Run Platform Like a Pro" is prominently displayed in large white text. A sub-section titled "Stay in control with smart tools and real-time insights" is shown, followed by a list of four features, each preceded by a green checkmark:

- Do monitor all activity in one dashboard
- Do approve vendors and review service quality
- Do approve drivers and review service reliability
- Open and close service hubs instantly

At the bottom of the sign-in page, a note states: "All BoatBites features are available in English only." On the right side of the image, the actual Admin Panel interface is shown. The URL "admin.boatbites.store" is visible in the browser's address bar. The interface has a light blue header with the "BoatBites Admin" logo and the tagline "Anchor. Order. Enjoy.". The top navigation bar includes links for "Home", "Dashboard", "Orders", "Vendors", "Drivers" (which is the active tab), "Boaters", "Service Hubs", and "Payments". A "Welcome, Vijay" message and a "Work" badge are also present. The main content area features a "Good evening, Admin" greeting and a "Service Hubs" section showing a world map with various location markers. A "Refresh" button is located in the top right corner of the main content area.
